

NEBU CHIRACKAL THOMAS

Software Engineer | Full-Stack Development | Cloud & DevOps | Systems Engineering

Pathanamthitta, Kerala, India | +91 9207376249 | nebuchthomas2003@gmail.com | github.com/nebuchthomas2003 | https://nebuchthomas2003.github.io/Portfolio_Website/

PROFESSIONAL SUMMARY

Software Engineer with First Class with Distinction (CGPA: 8.60/10) and hands-on experience in software development, system integration, deployment, and CI/CD. Proficient in Java, JavaScript, SQL, Object-Oriented Programming, Data Structures, Git, GitLab CI/CD, AWS, and web technologies with experience developing and deploying production-ready applications end-to-end. Strong understanding of software engineering principles, databases, APIs, version control, automated build and deployment pipelines, and reliable software delivery. Completed an AI/ML internship involving metrics-driven software evaluation and ROUGE benchmarking, resulting in a co-authored research publication indexed in IEEE Xplore. Seeking a Software Systems Engineer role focused on building, integrating, testing, and maintaining scalable, reliable, and high-quality software systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Web: React.js, Node.js, Bootstrap, Streamlit, Gradio

Databases: MySQL, SQL Server

DevOps & Cloud: Docker, GitLab CI/CD, AWS, Azure, Linux, Windows Server

Engineering Practices: Object-Oriented Programming, Data Structures & Algorithms, Git/GitHub, Agile/Scrum, Software Testing & Model Evaluation (ROUGE), Debugging

AI/ML: Machine Learning, NLP, Deep Learning, scikit-learn, Data Analysis

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Mavano Sports Academy

Jan 2026 – Apr 2026

- Engineered a responsive, cross-browser web application for Mavano Kids Academy using React.js, JavaScript, HTML/CSS, and Bootstrap, now live in production at mavanosportsacademy.com.
- Built and integrated backend functionality with a structured database layer, enabling reliable content management for academy operations.
- Owned the complete software delivery lifecycle as sole engineer — requirements, development, debugging, testing, and deployment — shipping a stable production release with zero external support.
- Performed ongoing application maintenance and bug fixes post-launch, ensuring consistent uptime and a smooth user experience.

Artificial Intelligence Intern | Infosys Springboard

May 2024 – Jul 2024

- Designed and built an NLP-based text summarization application in Python, implementing both extractive (TF-IDF, TextRank) and abstractive (T5, BART) modeling approaches.
- Rigorously validated model output quality using ROUGE evaluation metrics, establishing a repeatable benchmark process across multiple model variants.
- Developed and deployed an interactive Streamlit/Gradio interface, enabling non-technical stakeholders to test and compare summarization results in real time.

PROJECTS

Text Summarization Using NLP and Machine Learning | Personal Project

Aug 2024 – Aug 2025

- Extended internship research into a standalone system combining extractive and transformer-based abstractive summarization techniques.
- Automated text preprocessing and model evaluation pipelines, benchmarking performance with ROUGE metrics for consistent, measurable quality control.

Nutritional Meal Planner Using Machine Learning | Personal Project

Mar 2024

- Built a machine learning-based recommendation engine that generated personalized nutrition plans from user input data.
- Applied data processing and feature analysis techniques to improve recommendation accuracy and relevance.

github.com/nebuchthomas2003/Nutritional_Meal_Planer-ML

Salon Management System | Personal Project

Oct 2023 – Nov 2023

- Developed a full-stack web application to manage customer records, appointment scheduling, service tracking, and billing.
- Designed and implemented a normalized MySQL database schema backing a user-friendly management interface.

CERTIFICATIONS

- AWS Academy Graduate – AWS Academy Cloud Security Foundations
- Wipro TalentNext – Java Full Stack Development (Dec 2025)
- Infosys Springboard – Artificial Intelligence Primer Certification (Sep 2023)
- Salesforce Developer Virtual Internship — Apex, LWC, Process Automation (Superbadges: Apex Specialist, Process Automation Specialist, Developer Super Set)
- UiPath Academic Alliance – RPA Citizen Developer Program (Mar 2023)

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering | Mahendra Engineering College

Nov 2021 – Mar 2025

Affiliated to Anna University, Chennai — CGPA: 8.60/10, First Class with Distinction

LANGUAGES

English: C1 (Proficient)

German: A2 (Basic) — in active training alongside IELTS Academic preparation
